EDUCATION

University of Florida | *GPA: 3.34/4.0* Jan. 2024 – May. 2027
Bachelor of Science in Computer Engineering, Minor in Teaching Gainesville, FL

EXPERIENCE

Undergraduate Teaching Assistant | *Advanced Programming 1, 2* June 2024 – Present
University of Florida | *Gainesville, FL*

- * Voted best TA in 2025 by 70% of 764 responders.
- * Fostered 800+ upcoming computer engineering students.
- * Integrated personal projects as teaching material for students.

Computer Diagnostics & Repair Tech May 2024 – August 2025
Impact Computers | *Gainesville, FL*

- * Maintained, repaired, and disposed of home computers.
- * Developed C and Bash tooling to streamline repairs by collecting CPU data.
- * Recovered Customer Data from failing storage devices with 100% success

PERSONAL PROJECTS

NSA CTF Challenger | *Memory Analysis, Networking Analysis, Triage* Sep. 2025

- Participated in NSA Codebreakers with 300 participants.
- Utilized Volatility to navigate linux kernel memory dumps with an 80% return
- Manipulated Wireshark to Triage Malware samples transmitted over TCP

Teaching Tool (mini-vim) | *Teaches C, C++, Command Line, Teamwork* Aug. 2025

- Utilized to teach students basics in Kernel API's, C, and documentation.
- Implemented text editor "Vim" using Linked List based Data structures.
- Designed with Compiler Directives to enable cross platform usability.

C Interpreter | *C, C++, Data Structures* Mar. 2025

- Implemented python like C interpreter, with 0% memory leaks.
- Defined strong variable safety using TRIE's to manage over 1,000,000 parameters.
- Developed Multilevel abstractions from basic System calls.

Python Interpreter Hacking | *Python, File IO, Dynamic Programming* Feb. 2025

- Abused the python interpreter's behavior with local imports to attack private variables.
- Altered from a python zip bomb that causes system downtime after 3 minutes.

Seam Carving Algorithm | *C, C++, File IO, Dynamic Programming* Nov. 2024

- Utilized Kernel based energy weighing to dynamically take the best seam on an image.
- Reduced an image to 40% original size while still containing proper image ratios.

INVOLVEMENT

Cyber Security Club | *CTF Board chair* June 2025 – Present
University of Florida | *Gainesville, FL*

- * Competed in numerous CTF competitions to reverse engineer binaries.
- * Designed CTF reverse engineering challenges for club sponsored "SwampCTF"
- * Developed rev. challenge utilizing the music MIDI protocol with 15 solves.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL (SQLite), JavaScript, HTML/CSS, Rust, Bash, Clojure, Matlab
Frameworks: Wordpress, Django, NodeJS, React, Threat Modeling
Developer Tools: Git, GDB, Vim, CMake, Visual Studio, CLI, Netbeans, Eclipse, Binary Ninja
Libraries: Pandas, NumPy, Matplotlib, OS, x11, SfmL, Sqlite3
